

Khushiyon Ka Swaad

Committed to taste without compromising on health

A quick glance at Venu Group

Our founders are associated with the food industry since 1997 through Gulab Besan. Venu Group was established in 2006 at Chhatral, in the renowned industrial state of Gujarat, India. We are a leading manufacturer and supplier of premium quality Besan, Maida, Atta, Rawa and Suji under our flagship brand, Apple.

The why and the how of our existence

Vision

To become a trusted household food brand across India

Mission

To deliver high quality food products consistently with the help of advanced technology, R&D and focus on quality

That's how we are known in the market

Our brand is synonymous with purity, rich taste, high nutritional value, freshness and longer shelf-life.

Here's where we make it

Our food products are manufactured at three state-of-the-art facilities in Rajkot, Mehsana and Junagadh. These facilities boast of advanced infrastructure and imported machinery for food processing, filtering and quality check. We upgrade the infrastructure from time to time in order to leverage the latest advances in processing technology. We keep ourselves ahead of the curve so we could scale up and deliver in bulk at a relatively shorter notice. Our stringent quality-checking parameters ascertain that what goes out of our facility is top-quality food product.

No compromise on quality!

When it comes to quality, we believe in keeping all the three pillars in their best shape. These are people, process, and technology. Our people are experienced and have an in-depth knowledge of their respective fields. Our processes are well-defined and benchmarked against industry standards. Our technology is the latest and procured from some of the best in the world. Additionally, we procure top-quality raw materials and pass them through stringent quality checks at various levels of the process. All this collectively ensures that our products are high-quality and have consistently good taste, texture and freshness.
